

COMM.G.B.BURLOTTO

## *Langhe Nebbiolo doc Rosso*

**Production area:** Verduno

**Grapes:** Nebbiolo

**First year of production:** 1850

**Number of bottles produced per year:** 4000-5000

**Vineyards:** annually, according to weather conditions, you choose the vineyard planted to Nebbiolo from Barolo to offer a product that can be enjoyed from an early age.

**Exposition and altitude:** altitude and different exposures depending on the choice vine.

**Soil:** Medium mixture tending to calcareous silty

**Training system and planting density:** Guyot, 4500 plants per hectare.

**Average age of vines:** 7 to 20 years

**Yield per hectare at harvest of grapes:** 70 quintals

**Period and method of harvest:** the first half of October  
**Vinification** includes a fermentation-maceration for about 7 days in French oak barrels, with daily pumping over and punching. Temperature control in the case of excessive increases. Once the malolactic fermentation in steel, the wine matures 20 months in oak barrels from Allier and 35 hectoliters. After bottling, usually made in August, the wine is aged in cellars for at least six months.
